

PHARM MATH EQUATIONS

$$\text{Drops per minute} = \frac{\text{Volume} \times \text{Drip Factor}}{\text{Time (in minutes)}}$$

$$\text{Infusion time} = \frac{\text{Volume to be infused}}{\text{mL per hour}}$$

$$\text{Milliliters per hour} = \frac{\text{Volume (mL)}}{\text{Hours}}$$

$$\text{Dosage} = \frac{\text{Desired Dose}}{\text{Available Dose}} * \text{Quantity}$$
